Toxicology 146 (2000) 233–235

TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 146

Acetaminophen; Molybdate; Pentachlorophenol **146**, 23

Adenylate cyclase activity; Lead; β-Adrenergic receptor; Brain **146**, 93

β-Adrenergic receptor; Lead; Adenylate cyclase activity; Brain **146**, 93

Animal models; Cancer bioassays; Carcinogenicity; Transgenic mice; Hazard identification **146**, 149

Anticholinesterase; Organophosphate pesticide; Blood pressure; Heart rate; Pulse pressure; Body temperature; Motor activity **146**, 1

Anti-microsomal antibodies; Long Evans Cinnamon rat; Copper; Hepatitis; Protein disulfide isomerase **146**, 101

Antioxidant; β-Carotene; α-Tocopherol (vitamin E); Ascorbic acid (vitamin C); Protein oxidation; Prooxidant **146**, 37

Antioxidant; Cytotoxicity; T-2 toxin; Cell culture; In vitro **146**, 171

Apical membrane; Cisplatin; OK cells; Organic cation transporter; Tetraethylammonium; Basolateral membrane **146**, 187

Apoptosis; Liver; Gap junctions; Cell communication; Nongenotoxic hepatocarcinogens **146**, 15

Ascorbic acid (vitamin C); β-Carotene; α-Tocopherol (vitamin E); Protein oxidation; Antioxidant; Prooxidant **146**, 37

Autoimmunity; IFN-γ; $CD8^+$ T-cells; PLN assay; Streptozotocin **146**, 73

Basolateral membrane; Cisplatin; OK cells; Organic cation transporter; Tetraethylammonium; Apical membrane **146**, 187

Blood pressure; Organophosphate pesticide; Heart rate; Pulse pressure; Body temperature; Motor activity; Anticholinesterase **146**, 1

Blood pressure; Rapeseed oil; Spontaneously hypertensive rat; Wistar Kyoto rat **146**, 197

Body temperature; Organophosphate pesticide; Blood pressure; Heart rate; Pulse pressure; Motor activity; Anticholinesterase **146**, 1

Brain; Lead; β-Adrenergic receptor; Adenylate cyclase activity **146**, 93

Cadmium; Nitric oxide; Inducible nitric oxide synthase; Oxidative stress; Culture stress; Peritoneal macrophages **146**, 61

Cancer bioassays; Animal models; Carcinogenicity; Transgenic mice; Hazard identification **146**, 149

Carcinogenicity; Cancer bioassays; Animal models; Transgenic mice; Hazard identification **146**, 149

β-Carotene; α-Tocopherol (vitamin E); Ascorbic acid (vitamin C); Protein oxidation; Antioxidant; Prooxidant **146**, 37

$CD8^+$ T-cells; IFN-γ; PLN assay; Streptozotocin; Autoimmunity **146**, 73

Cell adhesion molecules; Gulls; Lead; Development; Nervous system **146**, 137

Cell communication; Apoptosis; Liver; Gap junctions; Nongenotoxic hepatocarcinogens **146**, 15

Cell culture; Cytotoxicity; T-2 toxin; Antioxidant; In vitro **146**, 171

Chemical sensitization; Mouse; Hypersensitivity; LLNA; TDI; HCA; DNFB **146**, 221

Cisplatin; OK cells; Organic cation transporter; Tetraethylammonium; Apical membrane; Basolateral membrane **146**, 187

Copper; Long Evans Cinnamon rat; Anti-microsomal antibodies; Hepatitis; Protein disulfide isomerase **146**, 101

Culture stress; Cadmium; Nitric oxide; Inducible nitric oxide synthase; Oxidative stress; Peritoneal macrophages **146**, 61

PII: S0300-483X(00)00212-2

Cysteine; Methylthiazoles; Microsomal epoxide hydrolase; Hepatotoxicity; Starvation; Methionine **146**, 111

Cytotoxicity; T-2 toxin; Cell culture; Antioxidant; In vitro **146**, 171

Cytotoxic T lymphocyte (CTL); Diethyl methylphosphonate (DEMP); Diisopropyl methylphosphonate (DIMP); Natural killer (NK); Sarin (isopropylmethylphosphonofluoridate) **146**, 209

Development; Gulls; Cell adhesion molecules; Lead; Nervous system **146**, 137

Diethyl methylphosphonate (DEMP); Cytotoxic T lymphocyte (CTL); Diisopropyl methylphosphonate (DIMP); Natural killer (NK); Sarin (isopropylmethylphosphonofluoridate) **146**, 209

Diisopropyl methylphosphonate (DIMP); Cytotoxic T lymphocyte (CTL); Diethyl methylphosphonate (DEMP); Natural killer (NK); Sarin (isopropylmethylphosphonofluoridate) **146**, 209

DNFB; Mouse; Chemical sensitization; Hypersensitivity; LLNA; TDI; HCA **146**, 221

EC_3 value; Local lymph node assay; Risk assessment; Sensitizers; Uncertainty distribution **146**, 49

Fatty acid; Liver; Fluoride toxicity; Neutral lipid; Phospholipid **146**, 161

Fluoride toxicity; Fatty acid; Liver; Neutral lipid; Phospholipid **146**, 161

Formic acid excretion; Trichloroethylene induced folate deficiency; Vitamin B_{12} **146**, 123

Gap junctions; Apoptosis; Liver; Cell communication; Nongenotoxic hepatocarcinogens **146**, 15

Gene expression; 8-oxo-dGTPase; Oxidative stress **146**, 83

Gulls; Cell adhesion molecules; Lead; Development; Nervous system **146**, 137

Hazard identification; Cancer bioassays; Animal models; Carcinogenicity; Transgenic mice **146**, 149

HCA; Mouse; Chemical sensitization; Hypersensitivity; LLNA; TDI; DNFB **146**, 221

Heart rate; Organophosphate pesticide; Blood pressure; Pulse pressure; Body temperature; Motor activity; Anticholinesterase **146**, 1

Hepatitis; Long Evans Cinnamon rat; Anti-microsomal antibodies; Copper; Protein disulfide isomerase **146**, 101

Hepatotoxicity; Methylthiazoles; Microsomal epoxide hydrolase; Starvation; Cysteine; Methionine **146**, 111

Hypersensitivity; Mouse; Chemical sensitization; LLNA; TDI; HCA; DNFB **146**, 221

IFN-γ; $CD8^+$ T-cells; PLN assay; Streptozotocin; Autoimmunity **146**, 73

Inducible nitric oxide synthase; Cadmium; Nitric oxide; Oxidative stress; Culture stress; Peritoneal macrophages **146**, 61

In vitro; Cytotoxicity; T-2 toxin; Cell culture; Antioxidant **146**, 171

Lead, β-Adrenergic receptor; Adenylate cyclase activity; Brain **146**, 93

Lead; Gulls; Cell adhesion molecules; Development; Nervous system **146**, 137

Liver; Apoptosis; Gap junctions; Cell communication; Nongenotoxic hepatocarcinogens **146**, 15

Liver; Fatty acid; Fluoride toxicity; Neutral lipid; Phospholipid **146**, 161

Liver; Microcystine–YR; Nodularin; Lysosomal enzymes; Mice **146**, 177

LLNA; Mouse; Chemical sensitization; Hypersensitivity; TDI; HCA; DNFB **146**, 221

Local lymph node assay; EC_3 value; Risk assessment; Sensitizers; Uncertainty distribution **146**, 49

Long Evans Cinnamon rat; Anti-microsomal antibodies; Copper; Hepatitis; Protein disulfide isomerase **146**, 101

Lysosomal enzymes; Microcystine–YR; Nodularin; Liver; Mice **146**, 177

Methionine; Methylthiazoles; Microsomal epoxide hydrolase; Hepatotoxicity; Starvation; Cysteine **146**, 111

Methylthiazoles; Microsomal epoxide hydrolase; Hepatotoxicity; Starvation; Cysteine; Methionine **146**, 111

Mice; Microcystine–YR; Nodularin; Lysosomal enzymes; Liver **146**, 177

Microcystine–YR; Nodularin; Lysosomal enzymes; Liver; Mice **146**, 177

Microsomal epoxide hydrolase; Methylthiazoles; Hepatotoxicity; Starvation; Cysteine; Methionine **146**, 111

Molybdate; Pentachlorophenol; Acetaminophen **146**, 23

Motor activity; Organophosphate pesticide; Blood pressure; Heart rate; Pulse pressure; Body temperature; Anticholinesterase **146**, 1

Mouse; Chemical sensitization; Hypersensitivity; LLNA; TDI; HCA; DNFB **146**, 221

Natural killer (NK); Cytotoxic T lymphocyte (CTL); Diethyl methylphosphonate (DEMP); Diisopropyl methylphosphonate (DIMP); Sarin (isopropylmethylphosphonofluoridate) **146**, 209

Nervous system; Gulls; Cell adhesion molecules; Lead; Development **146**, 137

Neutral lipid; Fatty acid; Liver; Fluoride toxicity; Phospholipid **146**, 161

Nitric oxide; Cadmium; Inducible nitric oxide synthase; Oxidative stress; Culture stress; Peritoneal macrophages **146**, 61

Nodularin; Microcystine–YR; Lysosomal enzymes; Liver; Mice **146**, 177

Nongenotoxic hepatocarcinogens; Apoptosis; Liver; Gap junctions; Cell communication **146**, 15

OK cells; Cisplatin; Organic cation transporter; Tetraethylammonium; Apical membrane; Basolateral membrane **146**, 187

Organic cation transporter; Cisplatin; OK cells; Tetraethylammonium; Apical membrane; Basolateral membrane **146**, 187

Organophosphate pesticide; Blood pressure; Heart rate; Pulse pressure; Body temperature; Motor activity; Anticholinesterase **146**, 1

Oxidative stress; Cadmium; Nitric oxide; Inducible nitric oxide synthase; Culture stress; Peritoneal macrophages **146**, 61

Oxidative stress; 8-oxo-dGTPase; Gene expression **146**, 83

8-oxo-dGTPase; Oxidative stress; Gene expression **146**, 83

Pentachlorophenol; Molybdate; Acetaminophen **146**, 23

Peritoneal macrophages; Cadmium; Nitric oxide; Inducible nitric oxide synthase; Oxidative stress; Culture stress **146**, 61

Phospholipid; Fatty acid; Liver; Fluoride toxicity; Neutral lipid **146**, 161

PLN assay; IFN-γ; $CD8^+$ T-cells; Streptozotocin; Autoimmunity **146**, 73

Prooxidant; β-Carotene; α-Tocopherol (vitamin E); Ascorbic acid (vitamin C); Protein oxidation; Antioxidant **146**, 37

Protein disulfide isomerase; Long Evans Cinnamon rat; Anti-microsomal antibodies; Copper; Hepatitis **146**, 101

Protein oxidation; β-Carotene; α-Tocopherol (vitamin E); Ascorbic acid (vitamin C); Antioxidant; Prooxidant **146**, 37

Pulse pressure; Organophosphate pesticide; Blood pressure; Heart rate; Body temperature; Motor activity; Anticholinesterase **146**, 1

Rapeseed oil; Blood pressure; Spontaneously hypertensive rat; Wistar Kyoto rat **146**, 197

Risk assessment; EC_3 value; Local lymph node assay; Sensitizers; Uncertainty distribution **146**, 49

Sarin (isopropylmethylphosphonofluoridate); Cytotoxic T lymphocyte (CTL); Diethyl methylphosphonate (DEMP); Diisopropyl methylphosphonate (DIMP); Natural killer (NK) **146**, 209

Sensitizers; EC_3 value; Local lymph node assay; Risk assessment; Uncertainty distribution **146**, 49

Spontaneously hypertensive rat; Blood pressure; Rapeseed oil; Wistar Kyoto rat **146**, 197

Starvation; Methylthiazoles; Microsomal epoxide hydrolase; Hepatotoxicity; Cysteine; Methionine **146**, 111

Streptozotocin; IFN-γ; $CD8^+$ T-cells; PLN assay; Autoimmunity **146**, 73

TDI; Mouse; Chemical sensitization; Hypersensitivity; LLNA; HCA; DNFB **146**, 221

Tetraethylammonium; Cisplatin; OK cells; Organic cation transporter; Apical membrane; Basolateral membrane **146**, 187

α-Tocopherol (vitamin E); β-Carotene; Ascorbic acid (vitamin C); Protein oxidation; Antioxidant; Prooxidant **146**, 37

Transgenic mice; Cancer bioassays; Animal models; Carcinogenicity; Hazard identification **146**, 149

Trichloroethylene induced folate deficiency; Formic acid excretion; Vitamin B_{12} **146**, 123

T-2 toxin; Cytotoxicity; Cell culture; Antioxidant; In vitro **146**, 171

Uncertainty distribution; EC_3 value; Local lymph node assay; Risk assessment; Sensitizers **146**, 49

Vitamin B_{12}; Trichloroethylene induced folate deficiency; Formic acid excretion **146**, 123

Wistar Kyoto rat; Blood pressure; Rapeseed oil; Spontaneously hypertensive rat **146**, 197
